

Specialist Paediatric Equipment School

Corgi Class Chair

The Corgi Class Chair provides support for children with mild postural instability, whilst maintaining the appropriate appearance for the classroom setting. A wide range of personal adjustments are available - and easy to do!

- Seat Depth Adjustment
- Hip Guide Adjustment
- Seat Height Adjustment
- Lateral Support Adjustment
- Footplate Height Adjustment

Corgi 2

*Low height
castor option*

Corgi 0

Corgi 1

Corgi Hi-Sitter

The Corgi Class Hi-Sitter shares all of the features of the Corgi Class Chair. The main difference is the higher working height to enable children to access areas of the curriculum such as Science and Technology.

Corgi Hi-Lo

Corgi Class Size 3
for larger children
and small adults

This new version of the Corgi line-up allows the user to power up to the correct height to work. This helps children operate more independently and avoids the need for height adjustable tables. The actuator lifts the seat position 300mm (12") from a start position of 420mm (16.5").

Tables

The **oneZone** table is designed to be large enough for a child and their teaching assistant to work together comfortably.

The height of the work surface can be adjusted from 425mm (16.5") – 825mm (32.5") catering for children from nursery age through to adults. Height adjustment is easy with the electric power controller

The work surface is 1380mm x 670mm (54.5" x 26.5") with the monitor shelf and cutout available as options. This gives plenty of room for two!

Solo workstation

Our table range also includes the Solo workstation which is manually operated with a tilting work surface.

Work surface 900mm (36") wide by 700mm (28") deep, height variation from 600mm (24") to 1000mm (40"), height and angle adjustment are made very simply by releasing the lever handle.

Space saving design when not required.

Cut out for joy stick control

Manual height adjustment

We supply tables for hundreds of applications! Let us find you a solution to your dilemma!
